We can repair or restore all of your bathroom fixtures. We are an owner operated company since 1980. We use a patented professional finish process. We fully warranty our long lasting, high quality finishes. We have a full staff of highly trained professionals. We can even do your work for you on weekends. We are fully insured for your safety and peace of mind. We provide free of charge estimates. We serve all areas from our Toms River, NJ office. We resurface any and all types of tubs and tiles. We can perfectly match any standard or custom color. We provide the neatest and fastest service around. We can even do your work for you on weekends. We service residential, commercial and industrial sectors. Established in 1980, Coast Bath Resurfacing is a family owned and operated company serving most of the tri-state area from our Toms River, New Jersey office. Our fleet of five radio dispatched trucks is big enough to handle large jobs without sacrificing the personal service you expect from a small company. All of our crews are factory trained and authorized to service Kohler, Jacuzzi, and Lasco fixtures. We are an exclusive dealership for these superior bath fixture corporations as well. Our office is open 8am to 4:30pm Monday through Friday. If your tub is old and worn out it acts like a sponge, absorbing soap, body oils and dirt making it almost impossible to keep clean. We can restore its original luster and shine without the excessive cost of replacement. Whether it is an emergency repair or a much anticipated renovation,

we specialize in all types of chipped and cracked fiberglass, Americast, cast iron, and acrylic bathtub repairs and complete bathtub resurfacing. We also resurface all porcelain, most fiberglass, acrylic, and cultured marble surfaces. We even resurface bathroom tile. We use a professional process. We use a Porcelaincote, a shiny ceramic coating that is sprayed on to produce a hard, glossy surface. The pedestal sink photos on the left side of this page show that... This pedestal sink was in an old Victorian home that had burned down. The owner wanted to save as much original hardware as possible. Before resurfacing, the sink was worn down, chipped, and grimy. Now it is as good as new! Coast Bath Resurfacing
